# Fact-checking (2012 – ongoing )

Not everyone agrees, however, that Democrats are not flip-flopping on the issue.

Mark Krikorian, executive director of the Center for Immigration Studies, a think tank that advocates for lower immigration, said that because the public doesn't know exactly what border barriers the Trump administration wants to build, Mulvaney's statement is not an "exact" comparison. But, he said, to dismiss it simply on that basis would be "tendentiously literal."

"The fact is that, other than the 'Mexico will pay for it' stuff, Trump is simply channeling the 2006 Secure Fence Act, and Schumer et al. who voted for it out of political calculation are indeed hypocrites for opposing the attempt to finally bring that law to fruition," Krikorian told us via email.

At the surface level, it is true in a broad sense that Democrats including Schumer, Obama and Clinton have in the past supported border fencing. All three voted for the Secure Fence Act of 2006, and all three supported the 2013 Senate immigration overhaul that passed the Senate, and which called for tougher border security including some additional fencing. But to claim that those measures are the same as what Trump is proposing is a stretch.

## Share The Facts

**Mick Mulvaney**

Director, Office of Management and Budget

**MISLEADING**

"We don't understand why the Democrats are so wholeheartedly against [President Trump's border wall]. They voted for it in 2006."

Fox News Sunday – Sunday, April 23, 2017

## THE WIRE

### Did Democrats Once Support Border Wall?

By Robert Farley Posted on April 26, 2017

[Like 835](#) [Tweet](#) [Pin It](#) [Share](#) 11

White House Office of Management and Budget Director Mick Mulvaney made an apples-to-oranges comparison when he said he couldn't understand why Democrats opposed supplemental funding for a border wall since many of them were for it back in 2006.

Mulvaney is referring to the Secure Fence Act of 2006, which called for construction of 700 miles of fencing and enhanced surveillance technology, such as unmanned drones, ground-based sensors, satellites, radar coverage and cameras. Sen. Chuck Schumer and then-Sens. Barack Obama and Hillary Clinton were among a bipartisan majority that voted in favor of the legislation, and it was signed into law by President George W. Bush.

In a very general sense, the Democrats named by Mulvaney supported a bill to build more

**Q:** Did the Supreme Court rule that public schools cannot teach students about Islam?

**A:** No. That false claim was spread by a network of fake news websites.

# It's not just checking

- Most aspects of modern reality are complex
- Explaining can be as important and useful as checking
  - Helps also analyze the future

# Libération Désintox: cost of saving Cyprus

The screenshot shows a blog post from 'DÉSINTOX le blog' on 'desintox.blogs.liberation.fr/blog/'. The post is titled 'Bobards en stock sur les plans de sauvetage européens'. It features three blue arrows pointing from the right side of the page to the sources of the statements.

**Statement 1:** «Les Français vont devoir donner 2 à 3 milliards d'euros pour des banques à Chypre. D'un côté on supprime les infirmières, on surtaxe les PME en France [...] mais quand il s'agit de donner de l'argent de l'UE, c'est-à-dire les Français, à des banques pourries à Chypre, on le donne». - Nicolas Dupont-Aignan, le 25 mars sur France Bleu

**Statement 2:** «C'est nous qui allons encore verser de l'argent puisque le MES s'est engagé à hauteur de dix milliards d'euros, dont deux milliards au titre de la France et des contribuables français». - Florian Philippot, le 25 mars sur France Info

**Statement 3:** «Comment peut-on imposer aux Français, aux classes populaires et moyennes, aux petites entreprises, de nouvelles taxes, des taxes sur les sodas, une hausse de la CSG de 550 millions d'euros, et d'un autre côté alimenter de 15 milliards d'euros supplémentaires en Grèce l'incendie de la zone euro ? On a même pensé à une taxe sur les parcs d'attraction !» - Marine Le Pen, en septembre 2011, au moment du deuxième plan d'aide à la Grèce

# Saving Cyprus: how much does it cost?

The article reads:

- The money is not **given** but **lent**
- The European Mechanism of Stability will lend **\$9bn**
- Out of which France contributes 20%  
(approximately **\$2bn**)

However, things are complicated because:

- The initial contribution of France to the EMS (\$16 bn) **counts** toward French public debt
- The remainder contribution (\$124) **is not**

INTOX

En période de rigueur budgétaire, les plan de sauvetage successifs offrent depuis trois ans un boulevard aux détracteurs de l'euro et de l'Europe. Nicolas Dupont-Aignan et Florian Philippot ont ainsi, de concert, dénoncé récemment les milliards déversés à Chypre au moment où les Français se serrent la ceinture. «Les Français vont devoir donner 2 à 3 milliards d'euros pour des banques à Chypre. D'un côté on supprime les infirmières, on surtaxe les PME en France [...] mais quand il s'agit de donner de l'argent de l'UE, c'est-à-dire des Français, à des banques pourries à Chypre, on le donne», dénonçait Nicolas Dupont-Aignan. En version Florian Philippot, cela donne : «C'est nous qui allons encore verser de l'argent puisque le MES s'est engagé à hauteur de 10 milliards d'euros, dont 2 milliards au titre de la France et des contribuables français». Un propos qui fait écho -notamment- à celui entendu quelque deux ans avant, dans la bouche de Marine Le Pen, au sujet cette fois du plan d'aide à la Grèce : «Comment peut-on imposer aux Français, aux classes populaires et moyennes, aux petites entreprises, de nouvelles taxes, des taxes sur les sodas, une hausse de la CSG de 550 millions d'euros, et d'un autre côté alimenter de 15 milliards d'euros supplémentaires en Grèce l'incendie de la zone euro ?»

DÉSINTOX

Quel impact ont donc les plans de sauvetage successifs de l'Euro? Et le dernier en date, en direction de Chypre, va-t-il contraindre les Français à allonger 2 milliards d'euros?

# Do we **need** to understand?

# Fact checking vs. fake news detection

- Fact checking is based on some **background information source**
  - Truth commonly agreed upon
- Fake news detection may or may not use a source
- E.g., text classifier (true, fake) trained with major news agency / fake content (often virulent style)

The screenshot shows a web browser displaying a blog post on the website <https://towardsdatascience.com/i-trained-fake-news-detection-ai-with-95-accuracy-and-almost-went-crazy>. The page header includes the site logo, navigation links for HOME, DATA SCIENCE, MACHINE LEARNING, PROGRAMMING, VISUALIZATION, PICKS, CONTRIBUTE, and a search bar. A sidebar on the right features a profile picture of Aaron Edell, his title as Co-founder and CEO of Machine Box, Inc., and his role as a Machine Learning Superfan, Agile Product Owner, Author, and Father. He is identified as an Amateur Programmer and the post was published on Jan 11 with a 7-minute read time. The main content of the post is titled "I trained fake news detection AI with >95% accuracy, and almost went crazy". Below the title is a blurred image of a person's face.

# Most common fact-checking scenarios

- "What is the **value** of metric **X** in space **Y** at time **T**?"
  - **X**=youth unemployment, **Y**=Germany, **T**=2018
  - **X**=illegal immigrants, **Y**=Italy, **T**=[2015-2018]
  - **X**=budget for research, **Y**=France, **T**=2019
  - **X**=average monthly wages, **Y**=China, **T**=2018
- Comparison patterns
  - **X1** against **X2**; **Y1** against **Y2**; **T1** against **T2**; temporal trend etc.

# Most common fact-checking scenarios

Deuxième trimestre mis à part, la France n'a pas la "croissance la plus faible de la zone euro"

# Most common fact-checking scenarios

- "What did X say about Y [at time T]?"
- "Is X related [in sense S] to Y?"

s.lemonde.fr/les-decodeurs/article/2015/11/09/les-arguments-perimes-de-la-gauche-parisienne-contre-valerie-pecresse\_48055

## Les arguments périmés de la gauche parisienne contre Valérie Pécresse

Le camp Bartolone a ressorti une déclaration de 2012 de la candidate de droite sur le mariage gay, faisant mine d'oublier qu'elle a, depuis, changé de position sur le sujet.

L'offensive est-elle concertée ? Spontanée ? Lundi 9 novembre, les socialistes franciliens et leurs soutiens font circuler sur les réseaux sociaux un article visant Valérie Pécresse, tête de liste Les Républicains en Ile-de-France : elle souhaiterait « démarier » les couples homosexuels.

FRANCE — ENQUÊTE

## Nicolas Sarkozy a bien servi les intérêts de Kadhafi. Voici les preuves

4 AVR. 2018 | PAR FABRICE ARFI ET KARL LASKE

Nicolas Sarkozy et Mouammar Kadhafi devant la maison du second bombardée par les Américains. © Reuters

Contrairement à ce qu'il a affirmé devant les juges puis dans les médias, Nicolas Sarkozy, actuellement mis en examen pour corruption dans l'affaire des financements libyens, a objectivement servi les intérêts du régime de Kadhafi entre 2005 et 2011. La preuve en cinq actes.

# Which existing technologies can be used?

- **Database queries?**
  - Journalists do not, generally, build databases.
  - "Not part of our job"
  - Persisting data is novel to some
  - SQL not user-friendly
  - Not always helped by journal information systems
- Remarkable exception:  
Ouest France

# Which existing technologies can be used?

- **Database queries?**
  - Journalists do not, generally, build databases.
  - "Not part of our job"
- **Curse of the coverage:** they need to cover (almost) any topic
- **Curse of noteworthiness:** write about hot topics of today (or tomorrow)
- They work under **strong time pressure**

# Which existing technologies can be used?

- **IR/NLP?**
  - Better options
- The outcome of fact-check has to be **explainable**
  - Not (only) "an ML algorithm said so"
  - But they don't like to train ML systems, either.
- **Extremely picky on data sources**
  - "Many Web sources claim it" is not an option

# Automatic source selection: FactMinder

# Improving access to reference data sources

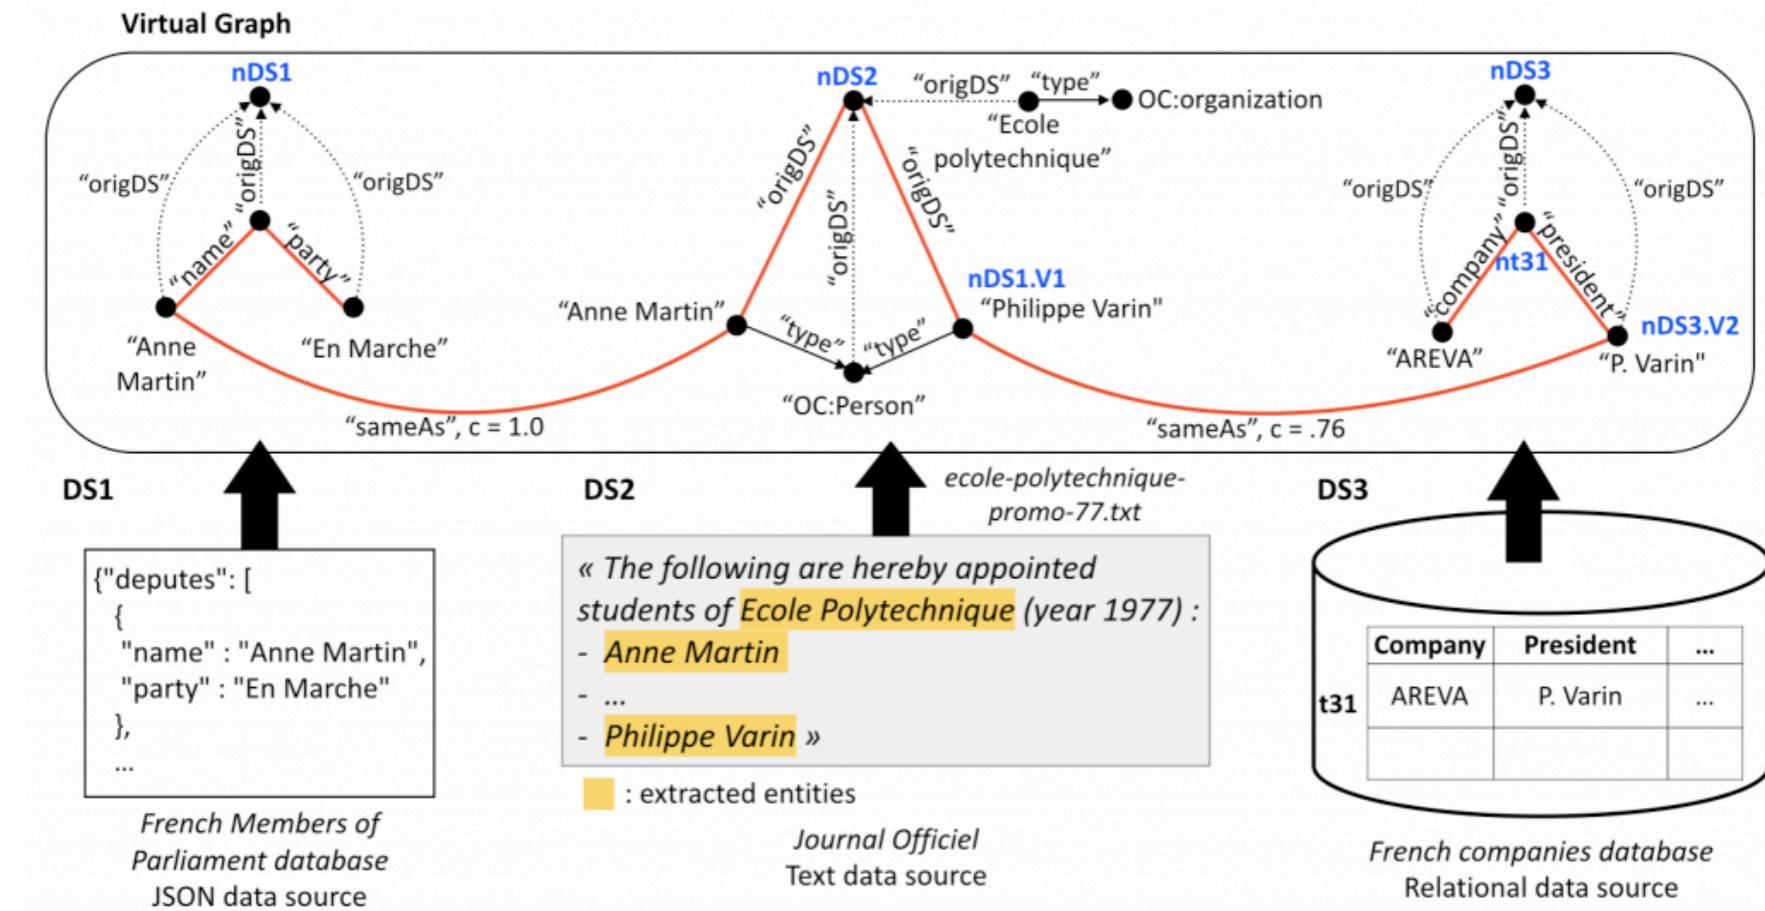

[BDA2018] T. D. Cao, I. Manolescu, X. Tannier. "Extracting Linked Data from statistic spreadsheets" (WebDB 2018, SBD 2017)

*"Créations d'entreprises en France en 2015"* → we return:

Créations d'entreprises dans quelques pays de l'Union européenne en 2015	
Pays	Taux de création en %
Allemagne	7,1
Belgique	6,2
Espagne	9,5
France (1)	9,5
Italie	7,5
Pays-Bas	10,1
Portugal	15,7
République tchèque	8,2
Royaume-Uni	14,3

# Keyword search across heterogeneous sources

[VLDB2018demo] C. Chanial, R. Dziri, H. Galhardas, J. Leblay, M. Le Nguyen and I. Manolescu: "ConnectionLens: Finding Connections Across Heterogeneous Data Sources"

# A data model for facts, statement and beliefs

With F. Goasdoué and L. Duroyon (U. Rennes 1)

Modeling who said what when

- "On Jan 22, 2017, Le Canard Enchaîné wrote that François Fillon had stated on Jan 21 that Penelope worked for the NA from 2002 to 2008."
- What has one actor heard of?
- Who knew this at that time?
- Who reversed their position on a topic?

# Summary of our work

- Automatically find most relevant reference data for a claim
  - RDF dump of full INSEE statistics
  - Table-aware full text search on the resulting graphs
  - Identifying statistic mentions in text (submitted)
- Identify connections between entities across heterogeneous content: ConnectionLens
- Modelling temporal facts, beliefs and statements

# **STATUS AND ROADMAP**

# Status

- Any **question answering framework** which can be plugged on trusted data sources is useful
  - Usually no time nor skills to integrate the data
- No IT infrastructure can be counted upon
  - More "a jumble of tools"
- ML promises a lot but delivery is hard(er)
  - Also: journalists ambivalence
- Strong and increasingly IT-literate community
  - E.g. <https://www.poynter.org/channels/fact-checking>

# Roadmap: computer science research

- DB, KR, IR, NLP
- In its most general statement, fact-checking supposes perfect NLP → study **sub-problems!**
- In fact-checking journalism, **human writers** chose topics, angle, style...
  - "A story wrapped around a query"
- Vision: build "**perfect data machines**" and give them to talented writers

# A vision of journalistic dataspaces

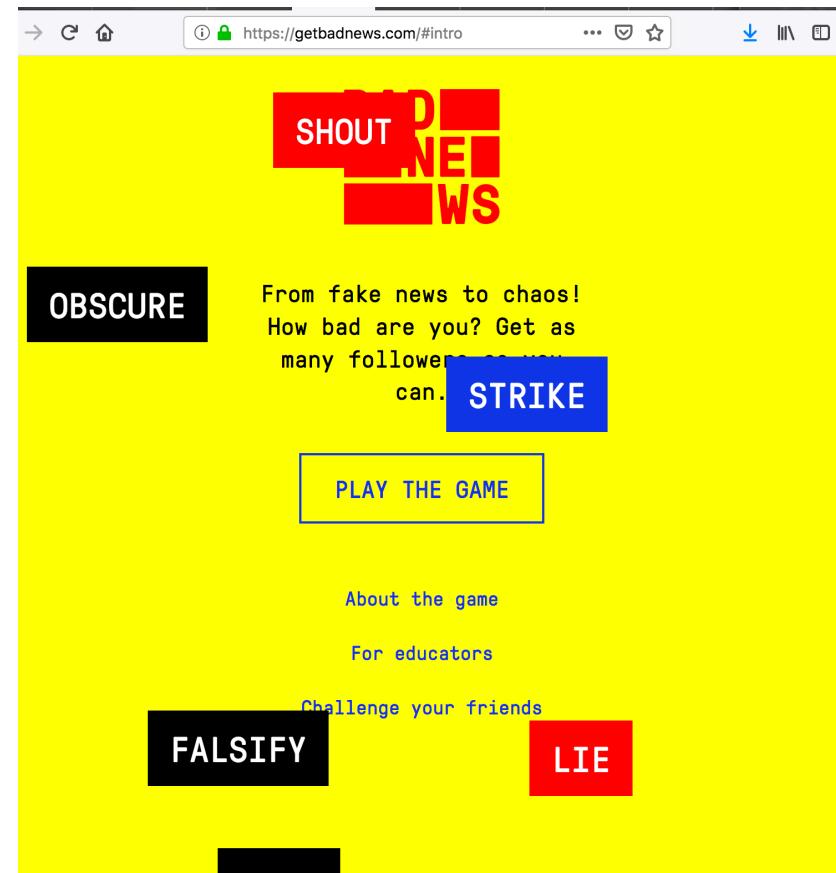

- "Dataspaces": Franklin, Halevy and Maier, SIGMOD Record 2005
- Ingest **data of any nature**: structured (relational), semistructured (JSON, XML, [social] graphs), unstructured (text), KB...
- Storage, indexing
- Search across the data
  - Dong and Halevy [SIGMOD 2017]: kwd search, result can come from any data source
  - Bonaque, Cautis, Goasdoué, Manolescu [**EDBT2016**]: document search with social score component
  - ConnectionLens: find answers in any combination of data sources; "ad-hoc linked data"

# Requirements for journalistic dataspaces

- Time
  - Of data acquisition
  - Of events described in the data
- Provenance
  - Authorship metadata
  - Annotation by users
  - Access control based on provenance and annotations
- Capacity to "derive" content (à la views)
- (Semi-automatic) semantic annotation and classification
- Social connections analysis
- Friendly interfaces
- Scalability

# Roadmap: society

- Educate: the general audience, journalists, other social scientists
  - "Fake news creation" games, e.g.  
<http://getbadnews.com>

# Roadmap: society

- Educate: the general audience, journalists, other social scientists
  - Education to media and the internet in schools

*In France, School Lessons Ask:  
Which Twitter Post Should You Trust?*

# Is this worth it?

“Some people will never be convinced”

- “Facts have a liberal bias” (Paul Krugman)  
<https://www.nytimes.com/2017/12/08/opinion/facts-have-a-well-known-liberal-bias.html>
- "Scientists and humanity scholars believe in a constructed, logical discourse, and believe **humans yield to reason**.  
Businesspeople **know this is not true**, in general. Businesspeople have thus an **advantage** in winning political competitions."  
George Lakoff, former Berkeley professor  
<https://georgelakoff.com/2016/11/22/a-minority-president-why-the-polls-failed-and-what-the-majority-can-do/>
- Conspiracy theory adepts believe two obviously contradicting theories [Wood et al., 2012]

**THANK YOU / QUESTIONS?**
